MORE POWER TO YOU

MASERATI GRANTURISMO

They are beautiful. They handle superbly. And now, their distinctive 4.7 litre V8 engine deliver 459 horsepower, providing you with more responsive power than before. Only those who have been behind the wheel of these extraordinary vehicles can fully comprehend the feeling this brings.

THE POWER

In the Granturismo S, Maserati's Low Friction Program further enhances the astonishing levels of power and torque. Reduced friction requires less effort for the engine to provide an additional 16 horsepower and 25 lbs. of torque, while at the same time increasing fuel efficiency and reducing emissions. In the Granturismo S Auto, a new MC Auto Shift gearbox features Manual Sport Mode for increased power and a Launch Control Mode that increases vehicle responsiveness.

THE SOUND

Nothing on earth sounds remotely like a Maserati engine, especially in the Granturismo S. It has a throaty roar that resonates to the very core of your being. This is also true in the Granturismo S Auto. By using its Auto Manual Sports Mode, the valves open at a lower rpm, resulting in the true, full-blooded Maserati sound.

THE STYLE

The Granturismo S features a Sport Pack that further adds to Maserati's distinctive appearance. Gloss black heptane-tyled 20" alloy wheels, MC Sport Line rear lip spoiler, MC Sport Line details in the body colour with carbon fibre insert, and new M-Design stitching on the seats further enhance a body style that is as beautiful to look at as it is powerful to behold.
